PROFESSIONAL SUMMARY

Versatile Full Stack Developer with **6+ years of hands-on experience** delivering production-grade web applications across diverse domains — from e-commerce platforms and SaaS tools to enterprise telephony systems and language-learning apps. Skilled in **PHP (Laravel, CakePHP)**, **JavaScript (VueJS, ReactJS)**, and **Node.js (AdonisJS)**, with deep experience integrating third-party APIs, payment gateways, and real-time systems. An early adopter of AI-assisted development workflows, including **OpenAI API integration**, **Claude Code**, **Cursor IDE**, and **GitHub Copilot**. Proven ability to deliver across both product and outsourcing environments

WORK EXPERIENCE

Backend Developer — Remote / Freelancer

Nov 2024 – Present

Self-employed | Vietnam & Japan

- Maintained and optimized Laravel-based backend systems for Japanese enterprise clients.
- Diagnosed and resolved complex bugs, improved API response times, and refactored legacy code to improve long-term maintainability.
- Managed database schema migrations, query optimization, and zero-downtime deployment support.
- Utilized **Claude Code**, **Cursor IDE**, and **GitHub Copilot** to accelerate development velocity and elevate code quality.

Full Stack Developer

Nov 2023 – Nov 2024

Coolmate | Vietnam

- Developed and maintained **Coolmate.me**, a leading Vietnamese men's fashion e-commerce platform handling high-volume daily transactions.
- Built robust backend services with Laravel covering product management, order processing, inventory sync, and returns handling.

VCCORP | Vietnam

- › Contributed to **Bizfly Email**, an enterprise-grade bulk email delivery system supporting scenario-based triggers, dynamic content personalization, and proactive spam-risk alerting.
- › Designed and optimized MongoDB schemas for high-volume email logs, activity tracking, and campaign configurations.

AI & DEVELOPER TOOLING EXPERIENCE

Practical AI Integration & AI-Assisted Development

- › Integrated **OpenAI API (PHP)** into the Vanecom e-commerce platform to deliver personalized product recommendations and automated customer support responses — reducing manual support load.
- › Used **Claude Code** for agentic, terminal-driven coding workflows: writing features, reviewing pull requests, and refactoring complex legacy systems.
- › Daily practitioner of **Cursor IDE** and **GitHub Copilot** for AI-assisted code completion, real-time suggestions, and multi-file refactoring across all active projects.
- › Applied structured **prompt engineering** techniques to accelerate boilerplate generation, automated test writing, and technical documentation production.
- › Consistently evaluates and adopts new AI developer tools to maintain a competitive development edge.
