EDUCATION

B.Eng. Information Security
Academy of Cryptography
Techniques (KMA), Vietnam
2016 – 2021

01 PROFESSIONAL SUMMARY

Versatile Full Stack Developer with **over 6 years of hands-on experience**, having deployed **10 production systems** across e-commerce, SaaS, enterprise telephony, advertising, edtech, and lifestyle. Proficient in **PHP (Laravel, CakePHP)**, **JavaScript (VueJS, ReactJS)**, and **Node.js (AdonisJS)**, with deep experience integrating third-party APIs, payment gateways, and real-time systems. Applies AI-assisted development workflows with **OpenAI API, Claude Code, Cursor IDE**, and **GitHub Copilot**. Able to deliver effectively in both **product** and **outsourcing** environments in Vietnam and Japan.

02 WORK EXPERIENCE

- Full Stack Developer — Remote / Freelancer** Nov 2024 – Present
Vietnam (CIT Group) & Japan (JAVIS Co., Ltd.)
Shipped 4 independent products: **Vanda** (AI e-commerce), **Heva** (home service booking — App Store), **Vương Kim Bảo** (feng shui — App Store), and **Jindo App** (Korean language learning).
Maintained and optimized Laravel backend systems for **JAVIS Co., Ltd.** — managed schema migrations, query optimization, and zero-downtime deployments.
Applied **Claude Code, Cursor IDE, and GitHub Copilot** across all active projects, significantly reducing development time.
- Full Stack Developer** Nov 2023 – Nov 2024
Coolmate · Vietnam
Developed and maintained **Coolmate.me** — Laravel backend handling high-volume orders, product management, inventory sync, and returns.
Built **ReactJS storefront** and **VueJS admin dashboard**; integrated **Shopee API** for cross-channel sync and **PortOne** for multi-method payments.
- Full Stack Developer** Dec 2021 – Nov 2023
CO-WELL Asia · Japan
Built **Ad-Start** — integrated Facebook Marketing API & Google Ads API, automated campaign creation, and real-time performance dashboards.
Developed **TobilaPhone Biz** (enterprise call filtering, CakePHP) and **Onsight-php** (real-time event scheduling, Laravel + ReactJS + PostgreSQL).
- Full Stack Developer** Dec 2019 – Dec 2021
VCCorp · Vietnam
Contributed to **Bizfly Email** — scenario-based email trigger engine, dynamic content personalization, and spam-risk alerting for large-scale enterprise campaigns.
Designed and optimized **MongoDB schemas** for high-volume email logs, delivery tracking, and campaign configuration.

03 AI & DEVELOPER TOOLING

Integrated **OpenAI API (PHP)** into **Vanda (Vanecom)** to deliver personalized product recommendations and automated customer support responses — reducing manual support load.
Used **Claude Code** for agentic, terminal-driven coding workflows: writing features, reviewing pull requests, and refactoring complex legacy systems.
Daily practitioner of **Cursor IDE** and **GitHub Copilot** for AI-assisted code completion, real-time suggestions, and multi-file refactoring across all active projects.
Applied structured **prompt engineering** techniques to accelerate boilerplate generation, automated test writing, and technical documentation production.
Consistently evaluates and adopts new AI developer tools to maintain a competitive development edge.

Vương Kim Bảo ●

Dec 2025 - Present · Team 3 · Backend Developer

Laravel · MySQL

Comprehensive feng shui lookup platform helping users explore fortune, interpret destiny by birth date, and discover feng shui items suited to their element. Laravel backend powering the mobile app — live on the **App Store**.

- Designed and built **RESTful APIs** for the mobile app, including authentication, birth date interpretation, and feng shui content delivery.
- Implemented the **feng shui recommendation engine** — element classification by birth date and product filtering logic.
- Modeled **MySQL schema** for fortune lookup data, user sessions, and product catalog with query optimization.

APP STORE

Heva ●

May - Nov 2025 · Team 5 · Full Stack Developer

Laravel · AdonisJS v6 · Socket.IO · Firebase · MoMo · ZaloPay · VNPay

Leading Vietnamese home service booking app — hair, beauty, and mom & baby care at home by verified professionals. AdonisJS APIs, realtime chat via **Socket.IO**, and flexible payments — live on the **App Store**.

- Built **AdonisJS v6 APIs** for booking flows, provider availability management, and service catalog.
- Implemented **real-time bidirectional chat** between clients and service providers using Socket.IO with Firebase push notifications.
- Connected flexible payment gateways (**MoMo, ZaloPay, VNPay**).

APP STORE

Vanda (Vanecom)

Nov 2024 - May 2025 · Team 5 · Full Stack Developer

Laravel · jQuery · OpenAI API · Firebase · 9Pay · ACB API · GiaoHangNhanh

Vietnamese e-commerce platform with web and mobile interfaces. Integrated **OpenAI API** for AI-driven product recommendations and automated customer support. Real-time delivery tracking via GiaoHangNhanh, Firebase notifications and live chat, and multiple payment gateways.

- Integrated **OpenAI API (PHP)** to power AI product recommendations and automated customer support — reducing manual support load.
- Built **full Laravel backend**: product catalog, cart, order lifecycle, multi-gateway payments (9Pay, ACB), and inventory management.
- Implemented **real-time delivery tracking** via GiaoHangNhanh webhooks and Firebase push notifications for order updates.

Jindo App

Jan 2025 - Apr 2025 · Team 5 · Full Stack Developer

Laravel · jQuery · Firebase · 9Pay

Korean language learning app for Vietnamese users featuring interactive lessons, quizzes, and progress tracking. Firebase for authentication, push notifications, and analytics. 9Pay integration for in-app subscriptions and purchases.

- Built **content and progress APIs** with Laravel for lesson structure, quiz scoring, and per-user learning history.
- Integrated **Firebase** for user authentication, scheduled push notifications, and learning analytics.
- Implemented **9Pay subscription flows** for premium content access and in-app purchase management.

Coolmate.me ●

Nov 2023 - Nov 2024 · Team 9 · Full Stack Developer

Laravel · ReactJS · VueJS · HTML/CSS/JS · PortOne · Shopee API

Leading Vietnamese men's fashion e-commerce platform handling high-volume daily transactions. Dual frontend (ReactJS storefront, VueJS admin), robust Laravel backend, Shopee cross-platform product sync, and PortOne payment processing.

- Developed and maintained **Laravel backend** for product management, order processing, inventory sync, and return workflows at high transaction volume.
- Built and iterated on **ReactJS customer storefront** and **VueJS admin dashboard** with dynamic UI components.
- Integrated **PortOne** for secure multi-method payment processing.

COOLMATE.ME

Ad-Start

Dec 2021 - May 2023 · Team 5 · Full Stack Developer

Laravel · VueJS · MySQL · AWS S3 · Facebook Marketing API · Google Ads API

Centralized advertising management platform for Facebook and Google campaigns. Automated ad creation, real-time performance dashboards, audience management, and budget control. Media assets managed via AWS S3.

- Integrated **Facebook Marketing API** and **Google Ads API** for automated multi-channel ad campaign creation and management.
- Built **real-time performance dashboards** and audience management tools with VueJS, surfacing key campaign KPIs.
- Designed **AWS S3 media pipeline** for storage.

Onsight-php

May 2023 - Nov 2023 · Team 10 · Full Stack Developer

Laravel · ReactJS · PostgreSQL

Event management platform for creating, scheduling, and tracking events with real-time updates, push notifications, and calendar integrations. Interactive calendar views and event dashboards built with ReactJS.

- Built **event creation, scheduling, and RSVP management APIs** with Laravel.
- Developed **interactive calendar UI and event dashboards** with ReactJS, including real-time update subscriptions.
- Designed **PostgreSQL schema** for complex event relationships, participant tracking, and notification queues.

TobilaPhone Biz

Aug 2022 - Nov 2023 · Team 10 · Full Stack Developer

CakePHP · Laravel · HTML/CSS/JS · MySQL

Enterprise telephony solution for filtering, blocking, and managing unwanted or spam calls. Centralized dashboard for call rules, blacklists, real-time call traffic monitoring, and fraud protection.

- Developed **call filtering rules engine** and blacklist management system in CakePHP for enterprise-scale spam call blocking.
- Built **admin dashboard** for real-time call traffic monitoring, rule configuration, and fraud detection reporting.
- Extended and migrated **legacy CakePHP modules to Laravel** to improve maintainability and performance.

Bizfly Email ●

Oct 2020 - Nov 2021 · Team 4 · Full Stack Developer

Laravel · jQuery · MongoDB

Enterprise bulk email delivery system supporting scenario-based triggers, dynamic content personalization, and proactive spam-risk alerting. MongoDB optimized for high-volume email logs and campaign activity tracking.

- Built **scenario-based email trigger engine** with configurable conditions, dynamic content personalization, and scheduling for large enterprise campaigns.
- Designed and optimized **MongoDB schemas** for high-volume email logs, delivery tracking, and campaign configuration storage.
- Implemented **proactive spam-risk scoring and alerting** to protect sender reputation and ensure inbox delivery rates.

BIZFLY.VN

Remote-Offer

Dec 2019 - Sep 2020 · Team 4 · Full Stack Developer

Laravel · jQuery · MySQL · Stripe

Recruitment platform for companies to post job listings, manage candidates, and publish company blogs. Stripe integration for paid job postings and subscription plans. Efficient search and application workflows for job seekers.

- Built **job listing and candidate management system** with role-based access for companies, recruiters, and applicants.
- Integrated **Stripe** for paid job post subscriptions and one-time listing fees with webhook-based payment status sync.
- Implemented **full-text job search** and application tracking workflows for efficient candidate-company matching.
