Shopee API · Socket.IO

EDUCATION

B.Eng. Information Security

Academy of Cryptography
Techniques (KMA), Vietnam

2016 – 2021

01 PROFESSIONAL SUMMARY

Full Stack Developer with **6+ years of hands-on experience** who has shipped **10 production systems** spanning e-commerce, SaaS, enterprise telephony, advertising, edtech, and lifestyle apps. Proficient in **PHP (Laravel, CakePHP), JavaScript (VueJS, ReactJS), and Node.js (AdonisJS)**, with deep experience integrating third-party APIs, payment gateways, and real-time systems. Embeds AI-assisted workflows using **OpenAI API, Claude Code, Cursor IDE**, and **GitHub Copilot** into daily development. Delivers reliably across both **in-house product** and **outsourcing** environments in Vietnam and Japan.

02 WORK EXPERIENCE

- Full Stack Developer — Remote / Freelancer** Nov 2024 – Present
Vietnam (CIT Group) & Japan (JAVIS Co., Ltd.)
Shipped 4 independent products end-to-end: **Vanda** (AI-powered e-commerce), **Heva** (on-demand home services — live on App Store), **Vương Kim Bảo** (feng shui platform — live on App Store), and **Jindo App** (Korean language learning).
Maintained and optimized Laravel backend services for **JAVIS Co., Ltd.**, including schema migrations, query optimization, and zero-downtime deployments.
Adopted **Claude Code, Cursor IDE, and GitHub Copilot** across all active projects, materially shortening delivery cycles.
- Full Stack Developer** Nov 2023 – Nov 2024
Coolmate · Vietnam
Developed and maintained **Coolmate.me** — a Laravel backend handling high-volume orders, product management, inventory, and returns.
Built the **ReactJS storefront** and **VueJS admin dashboard**; integrated **Shopee API** for cross-channel inventory sync and **PortOne** for multi-method payments.
- Full Stack Developer** Dec 2021 – Nov 2023
CO-WELL Asia · Japan
Built **Ad-Start**, integrating Facebook Marketing API and Google Ads API for automated campaign creation and real-time performance dashboards.
Developed **TobilaPhone Biz** (enterprise spam-call filtering in CakePHP) and **Onsight-php** (real-time event scheduling with Laravel, ReactJS, and PostgreSQL).
- Full Stack Developer** Dec 2019 – Dec 2021
VCCorp · Vietnam
Contributed to **Bizfly Email**, delivering a scenario-based trigger engine, dynamic content personalization, and spam-risk alerting for large-scale enterprise campaigns.
Designed and optimized **MongoDB schemas** for high-volume email logs, delivery tracking, and campaign configuration.

03 AI & DEVELOPER TOOLING

Integrated **OpenAI API (PHP)** into **Vanda (Vanecom)** to power personalized product recommendations and automated customer support — significantly reducing manual support load.
Uses **Claude Code** for agentic, terminal-driven workflows: implementing features, reviewing pull requests, and refactoring complex legacy systems.
Daily practitioner of **Cursor IDE** and **GitHub Copilot** for AI-assisted code completion, in-context suggestions, and multi-file refactoring across every active project.
Applies structured **prompt engineering** to accelerate boilerplate generation, automated test writing, and technical documentation.
Continuously evaluates and adopts new AI developer tools to stay on the leading edge of engineering productivity.

Vương Kim Bảo ●

Dec 2025 - Present · Team 3 · Backend Developer

Laravel · MySQL

A comprehensive feng shui lookup platform that lets users explore their fortune, receive birth-date-based destiny readings, and discover feng shui items matched to their elemental profile. Laravel backend powering the mobile app — live on the **App Store**.

- Designed and built the **RESTful API layer** serving the mobile app, covering authentication, birth-date destiny interpretation, and feng shui content delivery.
- Implemented the **feng shui recommendation engine** — classifying users' Five-Element (Ngũ Hành) profiles from their birth date and matching products accordingly.
- Modeled the **MySQL schema** for fortune lookup data, user sessions, and the product catalog, with targeted query optimization.

APP STORE

Heva ●

May - Nov 2025 · Team 5 · Full Stack Developer

Laravel · AdonisJS v6 · Socket.IO · Firebase · MoMo · ZaloPay · VNPay

Vietnam's leading on-demand home services app — connecting customers with verified professionals for hair styling, beauty treatments, and mother-and-baby care. AdonisJS APIs, real-time chat over **Socket.IO**, and flexible payment options — live on the **App Store**.

- Built the **AdonisJS v6 API layer** powering booking flows, provider availability management, and the full service catalog.
- Implemented **two-way real-time chat** between customers and providers using Socket.IO, backed by Firebase push notifications.
- Integrated multiple payment gateways (**MoMo, ZaloPay, VNPay**) to give customers flexible checkout options.

APP STORE

Vanda (Vanecom)

Nov 2024 - May 2025 · Team 5 · Full Stack Developer

Laravel · jQuery · OpenAI API · Firebase · 9Pay · ACB API · GiaoHangNhanh

A Vietnamese e-commerce platform with both web and mobile interfaces. Uses the **OpenAI API** to power AI-driven product recommendations and automated customer support, alongside real-time delivery tracking via GiaoHangNhanh, Firebase notifications and live chat, and multiple payment gateways.

- Integrated **OpenAI API (PHP)** to deliver AI-driven product recommendations and automate customer support, significantly reducing manual support load.
- Built the **full Laravel backend**: product catalog, cart, order lifecycle, multi-gateway payments (9Pay, ACB), and inventory management.
- Implemented **real-time delivery tracking** using GiaoHangNhanh webhooks and Firebase push notifications for live order status updates.

Jindo App

Jan 2025 - Apr 2025 · Team 5 · Full Stack Developer

Laravel · jQuery · Firebase · 9Pay

A Korean language learning app tailored for Vietnamese users, featuring interactive lessons, quizzes, and progress tracking. Firebase handles authentication, push notifications, and analytics, while 9Pay powers in-app subscriptions and one-off purchases.

- Built **content and progress APIs** in Laravel to serve lesson structure, quiz scoring logic, and per-user learning history.
- Integrated **Firebase** for user authentication, scheduled push notifications, and learning behavior analytics.
- Implemented **9Pay subscription flows** for premium content access and in-app purchase management.

Coolmate.me ●

Nov 2023 - Nov 2024 · Team 9 · Full Stack Developer

Laravel · ReactJS · VueJS · HTML/CSS/JS · PortOne · Shopee API

Vietnam's leading men's fashion e-commerce platform, handling high-volume daily transactions. A dual-frontend architecture (ReactJS customer storefront, VueJS admin console) sits on a robust Laravel backend with Shopee cross-platform product sync and PortOne payment processing.

- Developed and maintained the **Laravel backend** covering product management, order processing, inventory sync, and return workflows at high transaction volume.
- Built and iterated on the **ReactJS customer storefront** and **VueJS admin dashboard**, delivering dynamic, reusable UI components.
- Integrated **PortOne** to enable secure multi-method payment processing.

COOLMATE.ME

Ad-Start

Dec 2021 - May 2023 · Team 5 · Full Stack Developer

Laravel · VueJS · MySQL · AWS S3 · Facebook Marketing API · Google Ads API

A centralized advertising management platform for Facebook and Google campaigns, providing automated ad creation, real-time performance dashboards, audience management, and budget control. All media assets are stored on AWS S3.

- ▶ Integrated **Facebook Marketing API** and **Google Ads API** to automate multi-channel campaign creation and centralize management.
- ▶ Built **real-time performance dashboards** and audience management tools in VueJS, surfacing key campaign KPIs at a glance.
- ▶ Designed an **AWS S3-backed media pipeline** for scalable creative-asset storage and delivery.

JP.AD-START.AI

Onsight-php

May 2023 - Nov 2023 · Team 10 · Full Stack Developer

Laravel · ReactJS · PostgreSQL

An event management platform for creating, scheduling, and tracking events, with real-time updates, push notifications, and calendar integrations. Interactive calendar views and event dashboards are built with ReactJS.

- ▶ Built **Laravel APIs** for event creation, scheduling, and RSVP management.
- ▶ Developed the **interactive calendar UI and event dashboards** in ReactJS, with real-time update subscriptions.
- ▶ Designed the **PostgreSQL schema** to model complex event relationships, participant tracking, and notification queues.

TobilaPhone Biz

Aug 2022 - Nov 2023 · Team 10 · Full Stack Developer

CakePHP · Laravel · HTML/CSS/JS · MySQL

An enterprise telephony solution for filtering, blocking, and managing unwanted or spam calls, with a centralized dashboard for call rules, blacklists, real-time call traffic monitoring, and fraud protection.

- ▶ Developed a **call-filtering rules engine** and blacklist management system in CakePHP to block spam calls at enterprise scale.
- ▶ Built the **admin dashboard** for real-time call traffic monitoring, rule configuration, and fraud-detection reporting.
- ▶ Extended and migrated **legacy CakePHP modules to Laravel** to improve maintainability and overall system performance.

Bizfly Email ●

Oct 2020 - Nov 2021 · Team 4 · Full Stack Developer

Laravel · jQuery · MongoDB

An enterprise bulk email delivery system supporting scenario-based triggers, dynamic content personalization, and proactive spam-risk alerting. MongoDB is optimized for high-volume email logs and campaign activity tracking.

- ▶ Built a **scenario-based email trigger engine** with configurable conditions, dynamic content personalization, and scheduling for large enterprise campaigns.
- ▶ Designed and optimized **MongoDB schemas** for high-volume email logs, delivery tracking, and campaign configuration storage.
- ▶ Implemented **proactive spam-risk scoring and alerting** to protect sender reputation and safeguard inbox delivery rates.

BIZFLY.VN

Remote-Offer

Dec 2019 - Sep 2020 · Team 4 · Full Stack Developer

Laravel · jQuery · MySQL · Stripe

A recruitment platform enabling companies to post job listings, manage candidates, and publish company blogs. Stripe powers paid job postings and subscription plans, while streamlined search and application workflows serve job seekers.

- ▶ Built the **job listing and candidate management system** with role-based access control for companies, recruiters, and applicants.
- ▶ Integrated **Stripe** for paid job-post subscriptions and one-time listing fees, with webhook-driven payment status synchronization.
- ▶ Implemented **full-text job search** and application-tracking workflows to enable efficient candidate-company matching.
